Helena Neumannova, an author of patented method Epigenetical analysis for longevity of each body cell and a Founder of Lavander Valley and Molecules of Life method

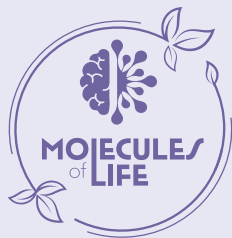

The European phenomenal SPA business based on exceptional minerals, herbs and SUPER plants takes place only in some spa cities of the Europe. However, it is strange and boring that if we come to London, Paris, Muscat, Dubai or Bangkok, the treatment consists of the same Ayurvedic indian oils and Thai massages with Prosecco in the whirlpool.

What makes Molecules of Life Organic method worldwide unique

Molecules of Life Organic method provides care for body, mind and soul in a functional holistic medicinal way with the help of natural means and methods that are based on European heritage and traditions. This method has been proven to be successful over thousands of years and has been backed by science.

Organic balneology method Molecules of Life is an ideal solution for body and mind healing and relaxation, and most importantly solving the reasons for health issues promptly with long lasting impact without any side effects.

We help people to prolong life, strengthen health and achieve vitality, and inner and outer beauty.

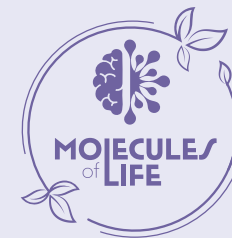

How all started with Molecules of Life

There was an Unique biodynamic substances – antibiotik, antivirotics, flavonoids, antioxidants – inside of 50 000 Organic Lavandula Bohemia in Lavander Valley at the beginning of Molecules of life.

It all started with Helena Neumannová, a founder of Molecules of Life, Lavandula Bohemia and Lavander Valley as well as Epigenetical method for LONGEVITY OF EACH BODY CELL, who has an interesting story to tell.

There was only 12 fields of queen of the herb Lavender Angustifolia Munstead in organic quality in the word in 2019. A lot of that herb solving CNS as a roof of our chonical but also acut problems were planted in very hot places according fantastic story of Provence.

What a SURPRICE it was to find out that in the past, as part of the migration of peoples, the Celts brought Lavender medicinal first to the Slavic territories such as the Czech Republic, Slovakia, Bulgaria, Hungary, Croatia. Only the religion Masters, later Hitler and even later the Communists destroyed that precious herb and its abilities.

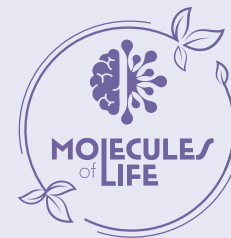

So nobody knew that Lavender Angustifolia Munstead stressed by a wind and breeze is able to save the life. So no one knew that Lavender Angustifolia Munstead, stressed by wind and frost in the Lavender Valley, could even save human life. This herb thus contains excellent and powerful medicinal and biochemical kontent.

We have seen such success in people after Covid, cancer, with Alzheimer's, RS, Parkinson's, depression or insomnia and anxiety that we asked as doctors, biochemists, scientists and the molecules of life were born.

The idea was clear. These countries with amazing minerals and knowledge must bring the best of the best in natural biomedicine in a holistic way of functional medicine. And join forces and start again. Together.

Fantastic EUROPEAN BRAND OF LOVE – DIOR IN HEALTH.

The mission of the Molecules of Life

To open the European heritage and treasure connected with science and the best and top producers in organic quality

Organic Lavandula Bohemia

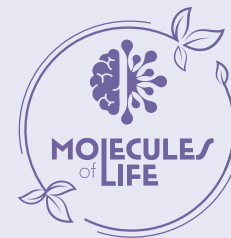

Less than an hour away from Prague, nestled in the Barrandien Geopark and surrounded by the stunning nature, you'll find Lavander Valley, a place where Molecules of Life balneology method was born, a unique retreat treasuring and spotlighting the many benefits of the European's organic herbalism culture.

The science of the 21st century confirmed with the discovery of epigenetics as the neurotransmitters are the processes and roof of all our functions and organs in 90% of our health and condition. Lavandula Bohemia regenerates and restores the function of this roof of the Central nervous system as well as body, mind and soul conditions.

In fact, the levels of exceptional biodynamic qualities found in Lavandula Bohemia's crop – backed by years of scientific research – were found to be up to six times higher than other lavenders worldwide. Lavandula Bohemia is also extremely high in such important minerals as calcium, magnesium and zinc, which your body needs to stay healthy.

The Lavandula Bohemia team have long partnered with Prague's University of Chemistry and Technology to certify that Lavandula Bohemia offers help from nature for a number of ailments, including depression, anxiety, insomnia, as well as various chronic and autoimmune diseases.

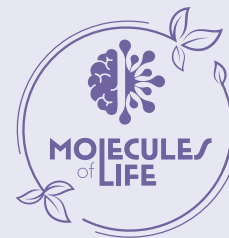

Organic Lavandula Bohemia, Rosa damascena and Peppermint – three leading herbs

Medicinal herbs have healing elements without unwanted side effects, they are not addictive and there is no risk of overdose. However, not all herbs can be considered as medicinal, only a herb that has grown in an environment that has not been damaged by chemical sprays and fertilizers can be considered as such. Therefore, in our products we only use high quality raw organic materials that are sourced from Lavander Valley and the rest of the Czech Republic and high quality suppliers from Slovakia, Bulgaria and nearby Europe.

We use historically tested recipes in combination with the latest medical research and possibilities. Like our ancestors, we approach the herbs in nature with great respect and humility and never take more than necessary from nature.

The three main herbs that are used in our products and treatments, and have historically proven healing effects are Organic Lavandula Bohemia, Rosa damascena and Peppermint.

Healing effects of Lavandula Bohemia

Lavender, grown in organic quality like Lavandula Bohemia, is not just a beautifully scented purple plant, it is primarily one of the most important medicinal herbs.

It has anti-inflammatory, antiviral and antiseptic effects, healing quickly and without side effects.

Provides energy in the morning and calmness in the evening according to the circadian code.

Contains flavonoids, which possess a number of medicinal benefits, such as anticancer and antioxidant properties.

Helps with anxiety, increased stress, depression and insomnia

Very effective for headaches, migraines, nausea and jet lag.

Helps in treating autoimmune diseases

Supports the natural function of the entire digestive system, helps with cramps, colic and inflammation of the intestines

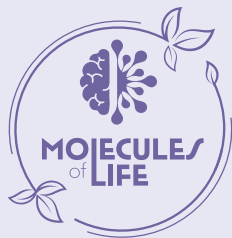

Has a beneficial effect on skin, helps with atopic eczema, psoriasis and acne.

Supports heart function and the cardiovascular system

Libido booster

Heals wounds, burns, and insect bites

Healing effects of Rosa damascena

Reduces cortisol levels and helps with anxiety and stress

High in vitamin C

Positive effect on the limbic system

Proven to benefit gynaecological health, helps with menstruation or menopause

It is a natural elixir with powerful effects, containing minerals, vitamins and antioxidants

Has strong antiviral, antiseptic and antibacterial properties

Is reported to contribute to reducing the risk of cancer and diabetes

Protects the brain against degenerative diseases

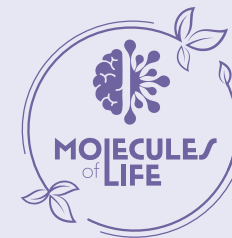

Has anti-inflammatory and soothing effects

Relieves tension, cramps and aids overall body regeneration

Rose extract helps with respiratory function

Rose tea made from fresh or dried leaves is full of antioxidants and has strong analgesic and anti-inflammatory effects

Rose petal oil softens, regenerates, moisturises and soothes the skin

Healing effects of Peppermint

The peppermint is not just a breath freshener, it is especially good as an aid for stomach discomfort

The royal position of peppermint in Africa and Asia is due to its ability to disinfect the entire stomach and digestive system in acute and chronic diseases.

Also helps with headaches, migraines and muscle pain

Has anti-inflammatory and disinfectant effect

Strengthens the nervous system and relieves stress

Relaxes muscles

It is a natural aphrodisiac

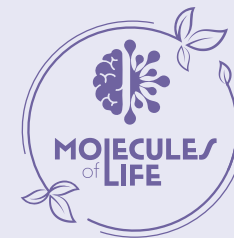

Solves flatulence, lack of appetite and prevents vomiting

Is effective for gallbladder problems and gallstones

Strengthens the liver and pancreas

Helps against colds

Disinfection of the oral cavity

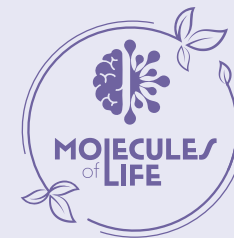

Healing Treatments

The Czech Republic rightly ranks among the top of the world SPA industry for its impressive results and expert SPA care.

However, what makes Molecules of Life balneology method to stand out is that our treatments and products are supported by medical and scientific knowledge, developed by our highly experienced team of doctors, naturopaths and massage therapists in combination with knowledge of European traditions and herbs.

For all our treatments we offer a choice of three powerful organic essential oils: Organic Lavandula Bohemia essential oil, Organic Rosa damascena essential oil, Organic Peppermint essential oil.

By combining with unique herbs from Austria, Bulgaria, Germany, Hungary and other top European growers and producers, a golden ratio of European science and products under the Love brand Molecules of Life was created.

Epigenetic analysis – the unique method

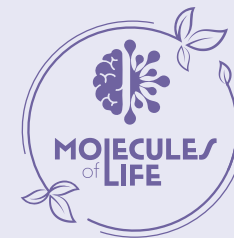

Epigenetic analysis is the unique method of holistic diagnosis of a person's psychological, physical and mental timeline leading to the reset of mindset, body, mind and soul take care and natural help for every day and each body cell

The fundamental stone which Molecules of Life balneology method is based on is that our body, mind and soul are interlinked and have effect on each other. Therefore, we strive to improve communication between the physical, mind and emotional state, so that they work in harmony with each other.

Epigenetic analysis has been well practised by the founder of Molecules of Life and Lavandula Bohemia – Helena Neumannová, a trained pediatric nurse and a long-time devotee of naturopathy.

The uniqueness of Epigenetic analysis is that with the help of highly knowledgeable, skillful and experienced therapists you will cross mental, physical and soul condition from birth to the current state of your life and take a step towards improving your mental condition, physical and psychological health with the help of naturopathy.

We will restore taste, strength and energy to life.

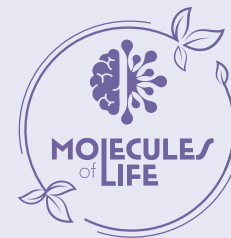

European SPA and herbal heritage

Europe is known for its Balneotherapie and SPA towns in the Czech Republic, Switzerland, Austria, Germany, Hungary and Slovakia, with Czech being one of the top SPA destinations thanks to its unique healing springs and minerals.

The Czech Republic has always been known as the herbal kingdom. Our ancestors knew how to heal with the help of herbs. In the present time Molecules of Life team cherish our European heritage and continue herbal traditions by using recipes and knowledge of function medicine that have been known and used for centuries. Therefore, we are honored that the Molecules of Life and Lavandula Bohemia team consists of nurses, doctors, scientists and naturopaths who combine modern medicine and thousands of years of proven results and experience with herbs and natural medicine into a harmonious combination.

More and more like-minded entrepreneurs, farmers and other specialists from the Czech Republic, Slovakia, Rumunia, Hungary, Bulgaria, Albania, Poland and many other countries reach out to us in order to cooperate and unite into a strong association to make a positive change.

Special MOLECULES OF LIFE hydrotherapy and balneo therapy procedures.

"Not all herbs are the herbs," says Helena Neumannova. "A plant that has not passed ORGANIC certification cannot be considered an herb at all. How about taking pesticides, antibiotics, hormones, microplastics or another chemical cocktail of poisons? **And that is exactly what happens to you with "a herbs" that do not have ORGANIC certification.** I do not know if they grew by the highway, next to a dry cleaner or the denim coloring manufacture factory in Thailand, China or India..."

FROM THE WORLD

"Scientists have discovered microplastics in tea bags that can increase the risk of cancer or infertility..."

(source: <https://www.forum24.cz/autor/martin-vavra>)

"Inspectors of the State Agricultural and Food Inspection Authority (SZPI) during an inspection of wholesalers and importers in cooperation with the Prague – Ruzyně Customs Office seized two shipments of basil from Thailand, in which laboratory analysis confirmed the presence of ten and seven pesticide substances exceeding the limit. Some exceeded the limits significantly, in one case the analysis revealed that the limit was exceeded 100 times and in two cases more than 40 times. Among the substances found exceeding the limit was the powerful insecticide carbofuran, which the EU banned in 2008 due to its adverse effects.

The total weight of the non-compliant batches reached almost 850 kg."
